

CALZADO HOMBRE/MUJER - TALLAS EUR

FOOTWEAR SIZING

Giro® cycling shoes were developed in a full range of sizes with the guidance of a multi-disciplinary team of footwear designers, last makers, biomechanical experts, and professional riders. In the process, every aspect of fit was considered including separate men's and women's lasts, half-size grading and the relationship between the shoe upper, footbed and outsole. The result is a comfortable, precision fit that combines the refined feel of traditional cycling shoes with the enhanced support of modern footbeds - whether you choose Giro® SuperNatural™ footbeds, other supportive footbeds, or custom cycling orthotics.
